

# Stora Enso live with KSD CWW (CustomsWorldWide)

Malmö, Sweden, July 2009

KSD Software, leading developer and supplier of customs solutions, today announces that The Stora Enso Oy has successfully implemented KSD CWW (Customs World Wide).

Stora Enso is a global paper, packaging and forest products company producing newsprint and book paper, magazine paper, fine paper, consumer board, industrial packaging and wood products. Stora Enso's sales total EUR 11.0 billion in 2008. The Group has some 29 000 employees in more than 35 countries worldwide

Stora Enso wanted one central installation of customs software, supporting their entities in different countries. Ensured compliance with applicable Customs regulations and automated declaration handling was also of great importance. Since it is a critical business process the system should be stable and able to handle different business demands and processes, and also to operate with short response times in spite of huge amount of data.

The solution KSD CWW (Customs World Wide) and the organization in KSD with knowledge and competence in customs rules and regulations, met the requirements from Stora Enso.

KSD was selected out of a number of providers. Hanna Sugiyama, Project Manager eCustoms Stora Enso: "We had a challenged project even before it had started, mainly due to legal time constraints, but the result exceeds my expectations. CWW was implemented on time on budget and with quality. It's not often you see these three key stones of a project fulfilled. One of the reasons for this success was the total commitment from the whole project team."

## **About KSD**
